NEW WESTMINSTER.

The Fraser River Beet Sugar Company, (Limited), has been formed for the purpose of Manufacturing Sugar from Beets, to be grown on land acquired by the Com-pany, consisting of rich alluvial soil well adapted for their growth

This land contains all the essentials necessary for the

cultivated in the most favored localities on the most improved principles.

The percentage of Saccharine matter, according to published records of European cultivators, gives \$ 10 5 per cent. as the average; whereas, in the Fraser Valley, the per centage was 10 to 11; six-tenths being granulated sugar of very fine quality, and the remainder melasses of fine flavor, a result unknown elsewhere.

This being the result on new land, and with the most imagerfect appliances, it will be readily understood, that with a proper system of cultivation, and with proper machinery, the profits of the company will be very large.

machinery, the profits of the company will be very large.

The quantity of sugar imported into this Province for the year ending June 30th, 1872, was valued at ever \$100,000; the importation of Molasses, during the same period, amounted to \$18,000. It will, therefore, be seen that a ready market is open for all the sugar and molecular the company can produce. The pulp, or refuse, composes the best kind of food for fattening entile during the winter months, when the highest prices are obtained for beef, mutton, &c.

The best of labor, it is calculated, will be as low as in California, while the fuel and other materials, including the lumber for benidding, will be much lower.

As the company proposes to commence operations on a limited scale at first, the Capital Stock has been fixed at \$50,000, while power is reserved to the Sharkelders to increase the working capital to \$100,000, if considered
